Paired homes expand options for buyers in Firestone

Brookfield Residential creates new way to live in Barefoot Lakes

CENTENNIAL, Colo. (May 20, 2019) – Leave it to [Brookfield Residential](#) to hit the latest homebuilding sweet-spot in the Denver area.

The “Home Evolved” company has begun accepting orders and unveiled models on a couple of new residential concepts available in the Barefoot Lakes community of Firestone, Colo.

For the first time, homebuyers can find paired homes in this community, as Brookfield Residential unveils its Villa Portfolio. But these are not just your basic side-by-side homes sharing a wall. These duplexes offer the utmost in privacy, for those home-buyers who like the benefits of multi-family structures, but who also want to keep to themselves. That’s why the Villa Portfolio, with its variety of designs and sizes, carries the tagline, “Paired homes with plenty of privacy and pizzazz.”

Not to mention “personality!”

Brookfield has achieved this maximum in paired-home privacy via its lay-out, with entrances in opposite sides of the building and main-floor bedroom suites with plenty of distance from entertaining areas. The Villas also come with an option for a finished basement that offers the potential for privacy within the privacy.

The square footage of the Villa Portfolio ranges from 1,348 to 2,043, with up to three bedrooms. Prices start at the high \$300s.

Also worth noting of these Villas: The spaces from the outside to the inside (and back out again!) flow almost seamlessly, from porch to dining room to patio. And the interior features a bright, sunlit layout, with easy movement from room to room. There’s also plenty of space for storage, including a closet the full length of a bedroom in the Villa 3, and a walk-in closet in the master suite.

The Villa Portfolio, which will also become available in Brighton Crossings this summer, also features a smart home technology with touchpad keyboard, doorbell camera, and [Z-Wave](#) thermostat and keycode lock.
